Government Engineering Academy Punjab, Canal Bank Road
Thokar Niaz Baig, Lahore – 53700. E-mail: cednf@yahoo.com Ph.042-99233551-52

To

The Executive Engineer,
Sidhnai Headworks Division,
Sidhnai.

No.D&F/2023/ 1002 /25/76, Dated 03 /05/2023.

SUBJECT: - FLOOD FIGHTING PLANS FOR FLOOD SEASON 2023.

Ref:- Your office letter No.495-97/4-W, Dated 17.03.2023.

The Flood Fighting Plan 2023 received from your Division under above reference is hereby vetted and returned.

Therefore, it is requested, to circulate the same copies of Flood Fighting Plan 2023, after approved by the competent authority to all stakeholders as well as 04 copies (soft copy of Flood Fighting Plans through E-mail:cednf@yahoo.com) to this office and 01 copy to Director Hydraulic Structure Safety Evaluation Cell situated at Government Engineering Academy Punjab, Thokar Niaz Baig, Lahore.

INDEX

FLOOD FIGHTING PLAN SIDHNAI HEADWORKS DIVISION

PART –A		
Chapter #	Description	Page
1	Salient features of Sidhnai Barrage.	1-5
	1.1 Location	
	1.2 General Description	
	1.3 Administrative setup	
2	Flood protection and River Training works.	6-11
	2.1 Design parameters of River Training Works.	
	2.2 Location Map	
3	Brief History of past flood events.	12
4	Design Data, Historic peak flood data and previous five years flood data of head Works / Barrages and other control points.	13-14
	4.1 Flood limits	
	4.2 Time lags of floods	
	4.3 Highest flood	
	4.4 Peak discharge	
5	Flood fighting strategy.	15-16
6	Flood damages restoration works.	17
7	Flood fighting watching arrangement.	18-21
	7.1 Pre-flood Arrangement	
	7.2 Watching establishment	
	7.3 Arrangement at sensitive sites.	
	7.4 Watching material	
	7.5 Arrangement for sounding & probing.	
	7.6 Lighting arrangement.	
	7.7 Ration arrangement	
	7.8 POL arrangement for vehicle	
	7.9 Transportation	
	7.1 Law and order	
	7.11 Medical arrangement for labour	
	7.12 Liaison with other department.	
	7.13 Role of the army	
	7.14 Duties of Telephone attendant	
7.15 Wireless arrangement		

8	Detail of encroachment	22-47
9	Duty roaster / Flood fighting program	48
10	Emergency Telephone Numbers.	49-50
11	Standard operating procedure (SOP) for breaching sections.	51-57
	11.1 History of the breaching section.	
	11.2 Location, design, quantity and variety of the Explosive required for detonation.	
	11.3 Arrangement of explosive and security of explosive stores.	
	11.4 List of the security staff alongwith detail of their training etc.	
	11.5 Detail of mechanical means as a stand by arrangements in case of detonation failure.	
	11.6 Duty Roster in Case of critical situation	
	11.7 Breaching committee with their action plan	
	11.8 List of Villages Likely to be inundated in case of breach.	
	11.9 Announcement and details of evacuation Arrangements.	
	11.10 Details of coordination with civil / Army Authorities	
	11.11 Parallel communication arrangements.	
	11.12 Index Plan	
PART – B		
12	Vulnerable sites on flood bund / structures.	58
	12.1 Apprehended breaches in flood bunds / structures.	
	12.2 Operation of Breaching Sections.	
	12.3 Breaches due to rise of flood water, deterioration of flood bunds.	
13	Emergency contingency plan for vulnerable sites. (Emergency contingency plan must include)	59-64
	13.1 Plan showing route of flood water coming out of the expected breaching point supported with levels.	
	13.2 Details of villages, abadies likely to be affected and this should also be shown on the plan.	
	13.3 Strategy and action taken be explained in detail. This may include:	
	13.3.1 Arrangements.	
	13.3.2 Establishment of flood fighting camps	
	13.3.3 Duties of officers / officials and their camp sites	
	13.3.4 Departmental machinery available	
	13.3.5 Machinery available from private source	
	13.3.6 Flood fighting material required	
	13.3.7 Flood fighting material available	
13.4 Detail of other infrastructure like Electric, Sui Gas, Telephone installation, Road network, other Buildings, Canals and Drainage network.		

14	Action Plan		65-68
	14.1	Re-shuffling / Recouping plan of reserve stone departmentally	
	14.2	Detail of inlet / outlet crossing along with closing methodology	
	14.3	Deployment Machinery (Medium to high flood)	
	14.4	Deployment Machinery (High to very high flood)	
	14.5	Deployment of Machinery (High to exceptionally high flood)	
	14.6	Police deployment plan	
	14.7	Details of synthetic bags with capacity of 500 kg and 1000 Kg	
	14.8	Details of polythene sheet of black color to protect upstream slope against wave action and to control seepage through embankments.	
15	Backup Divisions (in case of breach)		69

PART – A

Chapter - 1

SALIENT FEATURES OF SIDHNAI HEADWORKS

1.1 Location

1. In 1960, Indus Water Treaty gave water rights of Eastern Rivers (Ravi, Sutlej, Beas) to India and rights of Western Rivers (Indus, Chenab and Jhulem) were given to Pakistan. In order to overcome the scarcity of 30 MAF water, World Bank assistance was valuebale both on the technical and finance side as well as its role as a guarantor of the Massive structures known as Indus Basin Project. The Indus Basin Project comprises of construction of two Dams (Mangla and Tarbela), construction of five new Barrages and eight major link canals to pour 20 MAF water from the Indus and Jheulm to Ravi and Sutlej Irrigation command area.

2. Sidhnai Barrage was also constructed as one of the component of Indus Basin Project. It has been constructed about 6 miles upstream of the old Sidhnai weir almost 5 kilometers from Abdul Hakim city. The location of Sidhnai Barrage is unique in a sense that 11 No of its bays are in District Khanewal and 4 No bays in District Toba Tek Singh.

1.2 General Description

1. SIDHNAI BARRAGE

The meaning of the word "SIDHNAI" is Straight River. A stretch of eight miles of River Ravi at Sidhnai is nearly straight and does not meander. It is thought that it could be an artificial channel excavated in the distant past to prevent flooding in the Multan area.

Before Indus Water Treaty, the old Sidhnai weir with a maximum design capacity 100,000Cs was operational. The new Sidhnai Barrage was constructed 31000 ft upstream of old Sidhnai weir with design capacity of 150,000 Cs. Downstream straight reach was excavated and widened to increase the capacity from 100,000 Cs to 150,000 Cs. After demolishing old Sidhnai weir and Railway bridge new Railway bridge and road bridge on Multan Shorkot road were reconstructed at about 6500 ft and 31500 ft respectively downstream of Sidhnai Barrage. River Ravi falls into River Chenab near Fazil Shah village.

Recently Motorway M-3 bridge has been constructed at a distance of about 17000 ft downstream of Sidhnai Barrage. The object of new Sidhnai Barrage is to receive water from Chenab and Jhelum Rivers from Trimmu through T.S Link Canal and Haveli Main Line to feed off-taking canals of Sidhnai Barrage.

2. FEEDING CHANNELS.

After Indus water treaty, the water rights of all Eastern rivers were given to India that also includes river Ravi. In order to overcome the scarcity of water in river Ravi along with Haveli Main Line which is already playing a role of Feeding Channel to Sidhnai Weir, Trimmu Sidhnai Link Canal was also constructed. Hence the two feeding channels of Sidhnai Barrage are as under: -

- a) Trimmu Sidhnai Link Canal
- b) Haveli Main Line

a. TRIMMU SIDHNAI LINK CANAL.

T.S.Link canal was constructed to transfer River supplies of Jhelum and Chenab from Trimmu Barrage to River Ravi at Sidhnai Barrage. The total length of canal is 218,082 ft having discharge capacity of 11,000 Cs. A scheme namely "Rehabilitation of Trimmu – Sidhnai Link Canal (Controlling Seepage Water Logging along T.S Link Canal)" is underway under ADP whereby design parameters will be enhanced and discharge capacity of the channel will be increased from 11,000 Cs to 12,500 Cs.

b. HAVELI MAIN LINE.

Haveli Main Canal, with a capacity of 5,170 Cs., also off takes from Trimmu Barrage and runs parallel to the T.S.Link and after supplying water to the distributaries, it also falls into the River Ravi giving additional supply of 3,700 Cs to the Sidhnai Barrage.

3. OFFTAKING CHANNELS

2 No channels off takes from the left flank of Sidhnai Barrage. These off taking channels irrigate the most fertile land of Multan, Khanewal, Vehari, Bahawalpur, Lodhran, Pakpattan and Rahimyar Khan Districts etc.

The names of the channels are as under

- a) Sidhnai Mailsi Link Canal.
- b) Sidhnai Canal.

a. SIDHNAI MAILSI LINK CANAL.

It was constructed to transfer water from River Ravi to Lower Bahawal Canal through a Syphon at River Sutlej near Mailsi. Its designed capacity is 11,300 Cs with a total length of 374,983 ft. It is an unlined channel up to RD: 76+221 and lined from RD: 76+221 to Tail. It also supplies canal water to Lower Pakpattan Canal and Lower Mailsi Canal. This canal supplies water to fertile lands of Khanewal, Vehari, Multan, Lodhran and Bahawalpur Districts.

b. SIDHNAI CANAL

Initially Sidhnai Canal was fed from old Sidhnai weir. After the construction of new Barrage at present site, Sidhnai Feeder Canal was constructed to feed Sidhnai Canal from new Sidhnai Headworks. Now L-Section of Sidhnai Canal has been revised and Sidhnai Feeder has been merged into Sidhnai Canal. This canal supplies water to Khanewal and Multan Districts. Its designed capacity is 4005 Cs with a total length of 185+761ft.

4. U/S FLOOD EMBANKMENT.

In order to overcome the afflux produced due to construction of Sidhnai Headworks, 02 No. Marginal Flood Bunds i.e Left Marginal Bund and Right Marginal Bund have been constructed to channelise the river flow through the Headworks.

a. LEFT MARGINAL BUND (LMB)

The L.M.B has a length of 89,585 feet with a design width of 25 ft with river side slope as 2:1 and country side slope as 3:1. The designing of flood bund is based on 1988 flood. It has a free board of 6 ft. Left Marginal Bund has been provided with a ring bund starting from Bund RD:13+500 to RD:14+500. A Mole Head Spur at RD:15+000, X-Spur at RD:16+900 & RD:31+000 and J-Head Spurs at RD:20+800 & RD:38+000 have also been provided on the L.M.B. Four No. solid stone spurs having length 235 ft have also been provided.

b. RIGHT MARGINAL BUND (RMB)

The Right Marginal Bund has 115,000 feet with a design width of 25 ft with river side slope as 3:1 and country side slope as 3:1. The designing of flood bund is based on 1988 flood. It has a free board of 6 ft. Right Marginal Bund has been provided with J-

Head Spur at RD:99+500 and X-Spur at RD:108+500. The Right Marginal Bund has also been provided with wetting channel from RD: 0+000 to RD:11+000.

5. D/S PROTECTION BUNDS.

The Left and Right embankments of old Sidhnai weir were converted into Left and Right Protection Bunds of Sidhnai Headworks. The total length of Left and Right downstream protection bunds is 31000 ft.

6. U/S GUIDE BANK.

Sidhnai Barrage has been provided with Guide Bank upstream right side. The Guide Bank is totally covered due to masking on Right side.

7. SPILL CHANNEL.

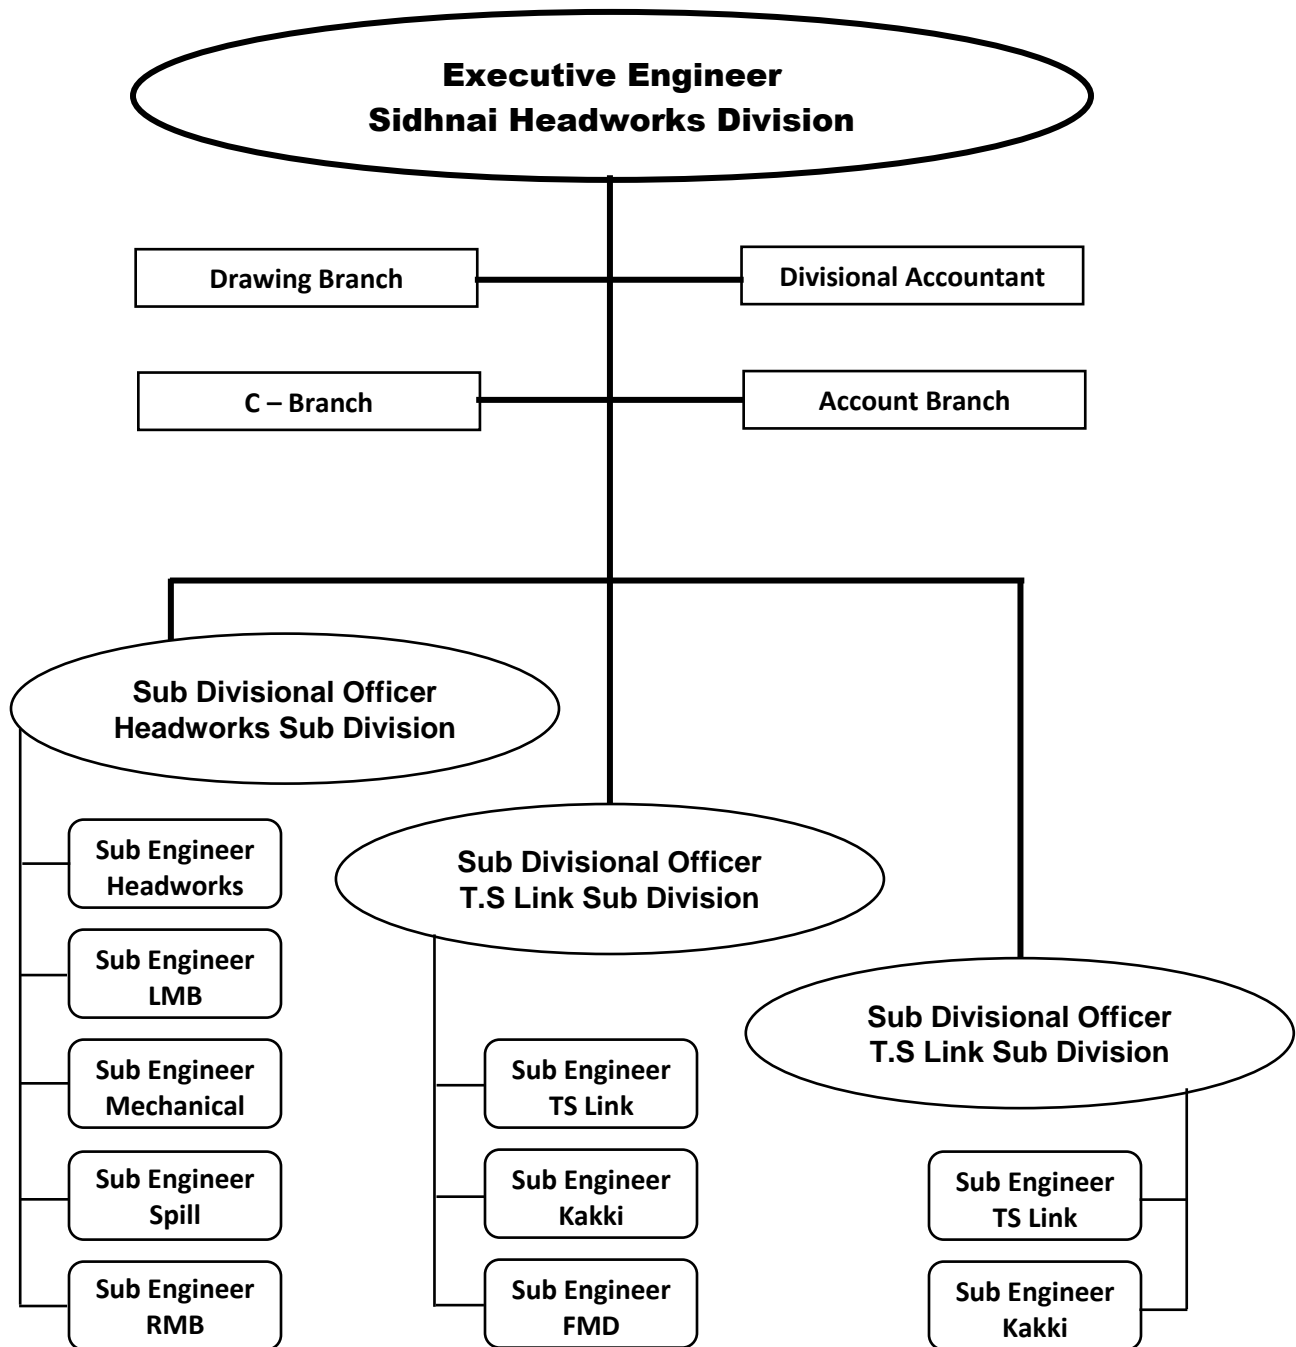

Spill Channel has been constructed to reduce the flood thrust on old Sidhnai weir in 1959 with a design capacity of 30,000 Cusecs but excavated for 20,000 Cs. After the construction of new Sidhnai Headworks, only head regulator was renovated for a capacity of 45000 Cs as Indus Basin Scheme and the rest of the channel is yet to be renovated. Therefore, after the construction of Sidhnai Headworks, spill channel never received its design share even in the extreme flood conditions. The maximum flood discharge ever flowed in Spill Channel was 21,968 Cusecs in 1988. The spill channel needs a comprehensive renovation and rehabilitation. The total length of spill channel is 69602 ft. The importance of spill channel has increased a lot after the construction of Motorway. Although National Highway Authority has submitted an undertaking for safe passage of water from flood opening provided by them yet irrigation authorities have great concern on it.

8. BREACHING SECTION.

A breaching section was approved between RD:15-16 R.M.B. A critical gauge has been provided at RD:10+000 Left Marginal Bund to watch the thrust of the flood. On achieving the flood level as 478.00 at this critical gauge and while the river is still in raising position, the breaching section at RD:16+000 Right Marginal Bund is activated. It has been estimated that a discharge of about 45,000 Cs will pass through breaching section, if operated. This breaching section was operated during 1973, 1976 and 1988 to pass the excessive discharge. Location plan of breaching section is attached.

1.3 ADMINISTRATIVE SETUP.

Sidhnai Headworks Division, Sidhnai has three Sub Divisions located at Sidhnai Headworks, Shorkot Cantt: and Kacha Khuh. The Administrative Setup of Sidhnai Headworks Division, Sidhnai is as under: -

Chapter - 2

FLOOD PROTECTION AND RIVER TRAINING WORKS

2.1

A- DESIGN PARAMETERS OF RIVER TRAINING WORKS.

Sr. No.	Name of bunds/spurs	Length in feet	Top width	Side slope		Free board
1	Left Marginal bund.	89585	25'.0	3:1	2:1	6'.0 above HFL 1988
2	Right Marginal bund.	115000	25'.0	3:1	3:1	6'.0 above HFL 1988
3	Wetting channel along Right Marginal bund.	11000	6'.0	3:1	2:1	3'.0 above HFL 1988
4	X-spur left Marginal bunds RD:-16900 RD:-31000	840	15'.0	3:1	3:1	6'.0 above HFL 1988
		900	15'.0	3:1	3:1	6'.0 above HFL 1988
5	J-Head spur RD:38000 LMB	6800	25'.0	3:1	3:1	6'.0 above HFL 1988
6	J-Head spur RD:20800 LMB	5200	25'.0	3:1	3:1	6'.0 above HFL 1988
7	Mole Head spur RD:15000 LMB	1465	20'.0	3:1	3:1	3'.0 above HFL 1988
8	J-Head spur RD:99500 RMB	7200	25'.0	2:1	2:1	6'.0 above HFL 1988
9	X-spur RD:108500 RMB	500	20'.0	3:1	3:1	6'.0 above HFL 1988
10	4 No solid stone spur along LMB	235x4=940	5'.0	5:1	5:1	-
11	Left D/S Protection Bund	30000	25'.0	3:1	2:1	5'.0 above HFL 1988
12	Right D/S Protection Bund	30000	25'.0	3:1	2:1	5'.0 above HFL 1988

Total length of flood bunds = 60 miles.

B- DESIGN PARAMETERS BARRAGE AND ITS ALLIED STRUCTURE.

1. Designed flood capacity of Barrage	1,50,000 Cs
2. Max: capacity of structure	1,87,105 Cs
3. Max: discharge observed before construction of the Barrage	1,95,000 Cs
4. Max: discharge observed after construction of Barrage	3,30,210 Cs
5. Unit Discharge for Design of Apron	252.8 Cs/ Ft
6. Loseness Factor	24.8 %
7. Maximum Head Across	30 Ft
8. Length of Divide Wall	230 Ft
9. Width of Divide Wall	08 Ft
10. Length of Impervious Floor U/S	30 Ft
11. Length of Impervious Floor D/S	105.67 Ft
12. Design Water way 15 x 40	600.00 Ft
i). Water Way Main Weir 11 x 40	440.00 Ft
ii). Water Way Undersluice 2 X 40	80.00 Ft
iii). Water Way Silt Excluder 2 X 40	80.00 Ft
13. Existingl Water Way (Due to Masking)	600-220=380 Ft
14. No of Pier	14
15. Width of Pier	08 Ft
16. Length of Bridge B/W Abutment	712 Ft
17. No of Gates on Headworkts	15 Nos
18. Type of Gate	Stoner Type

19. Lift of Gate	Vertical Lift
20. Factor of safety against sliding:	1.40
21. Lacey factor for apron U/S:	1.25
22. Lacey factor for apron D/S:	1.75

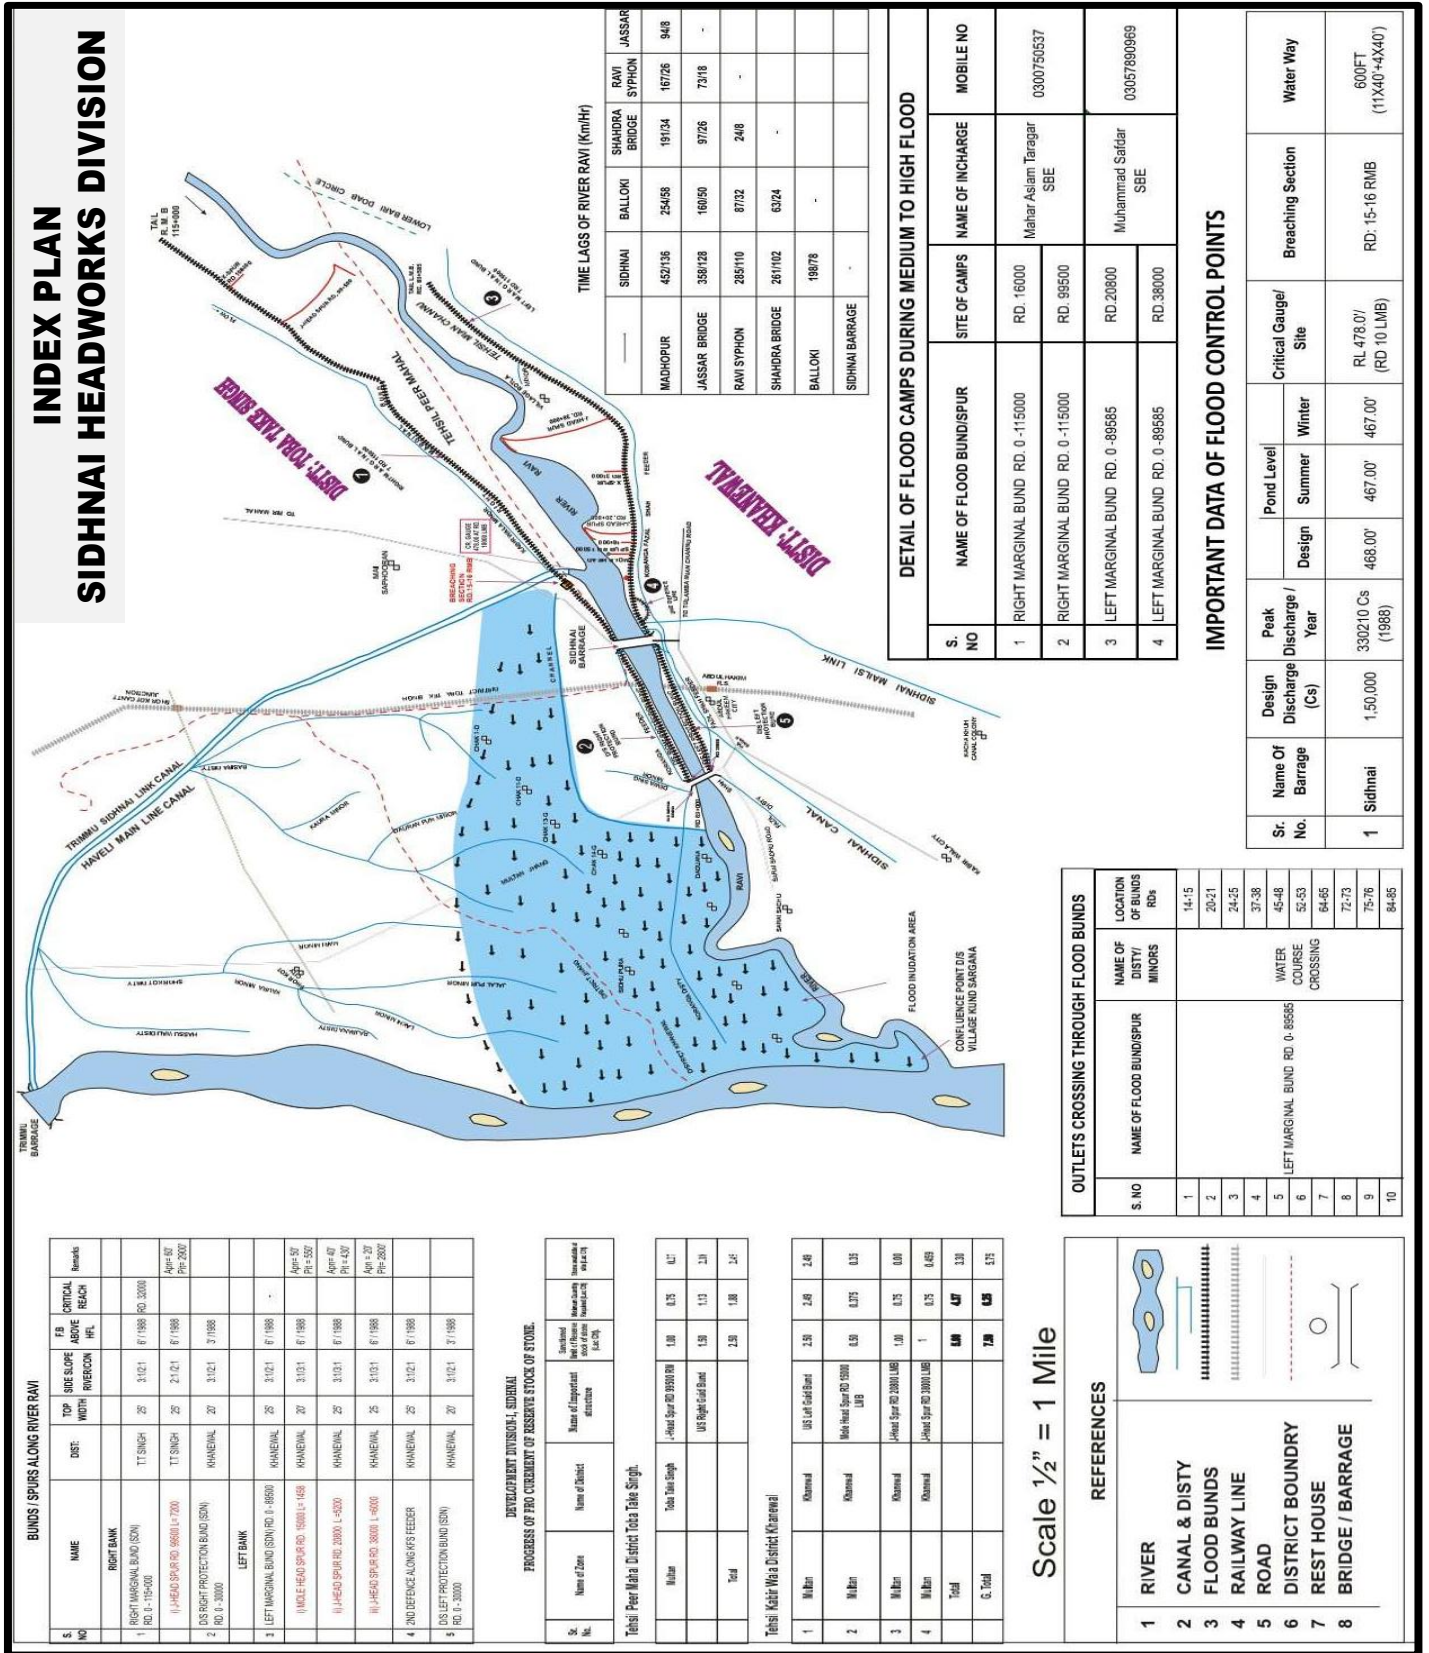

Reduce Level of

22. Crest of main weir	+454.00 Ft
23. Crest of under sluices (Pocket)	+449.50 Ft
24. Crest of Head regulator of Sidhnai Canal	+458.00 Ft
25. Crest of Head Regulator of Sidhnai Mailsi Link	+458.00 Ft
26. Floor of U/S Main weir	+446.00 Ft
27. Floor of D/S Main weir	+437.50 Ft
28. Top of Bridge service road	+484.00 Ft
29. Top R.L of Divide Wall:	+472.00 Ft
30. Top R.L of Splay Wall D/S	+477.00 Ft
31. High flood level upstream (1,50,000 Cs)	+476.30 Ft
32. High flood level downstream (1,50,000 Cs with Eroded Bed)	+470.00 Ft
33. F.S.L Koranga Aqueduct at Barrage Left Abutment	+477.25 Ft
34. F.S.L Koranga Aqueduct at Barrage Right Abutment	+476.30 Ft
35. Normal pond level	+467.00 Ft
36. Max (Emergency): pond level	+468.00 Ft
37. Top of gates level (Barrage)	+469.00 Ft

General

38. Width of crest	5.00ft
39. D/S Left protection Bund	30000.00ft
40. D/S Right protection Bund	30000.00ft
41. Height of Barrage Gate	15.0 ft
42. Height of Sidhnai Feeder Gate	11.0 ft
43. Height of S.M Link Canal Gate	11.0 ft
44. Time taken to raise One Gate.	
Manually	= One ft in One Hour.
Electrically	= Full Gate One Hour.
44. Height of super structure	10.00 ft
45. Width of Head way	24.00 ft
46. Width of Foot Path	4.50 ft
47. Total width of Head regulator of Sidhnai Feeder	118.00 ft
48. Total width of Head regulator of Sidhnai Mailsi Link	303.00 ft
49. Width of crest of Sidhnai Feeder	5.00 ft
50. Width of crest of Sidhnai Mailsi Link	5.00 ft

Chapter - 3

BRIEF HISTORY OF PAST FLOOD EVENTS

The highest flood passed on 2-10-1988 in the history of Sidhnai Barrage at River Ravi. The total discharge U/S Barrage was 3,30,210 Cs out of which 2,55,012 Cs passed through weir of Barrage, 45,000 Cs through the Breaching Section and 21,968 Cs was passed through the Spill Channel. The H.F Level U/S of the Barrage recorded at Principle Gauge (LMB RD 10+000) was 478.20 while the HFL U/S of Sidhnai Barrage was 477.88 and D/S Gauge was 477.60. However, despite passing 2,55,012 Cs against 1,50,000 Cs design capacity, the structure of the Barrage remained safe. The flood also seriously affected the area on the right side upstream of Sidhnai Barrage particularly in Pir Mehal area. The right protection embankment of newly constructed Chichawatni Bridge had to be cut to provide relief to the bridge. The flood water from these cuts inundated the area on both sides. The downstream structure wing wall was raised by 4.00 ft after that highest flood for providing safe freeboard.

After the exceptionally high flood of 1988, very high floods passed through the barrage in 1995 and 1996 having discharge of 2,12,340 Cs and 1,95,362 Cs respectively. During these floods, the J-Head spur at RD: 38+000 LMB was under the direct hit, which was saved through hectic flood fighting.

Breaching section was operated during the year 1973, 1976, & 1988.

R.M.B was breached during the year 1988 at RD: 40-41.

(Lac Cs.)

BREACHING HISTORY					
Year	Weir	Breach	Spill	Canals	Total
18.08.1973	1.80	0.15	0.15	0.00	2.10
15.08.1976	1.93	0.41	0.09	0.05	2.49
02.10.1988	2.55	0.45	0.22	0.08	3.30

Chapter – 5

FLOOD FIGHTING STRATEGY

1. LOW FLOOD

When River Ravi at Sidhnai Barrage reaches above 30,000 Cs, it is in low flood. At this stage flood water remains within the lips of the River. It does not touch any flood embankment. However, one No. Beldar per mile per shift of 12-hours is engaged on L.M.B and R.M.B and other X-spurs for upkeeping of these bunds.

2. MEDIUM FLOOD

Beyond 45,000 Cs and upto 60,000 Cs, River is in medium flood. At this stage, water starts touching the flood embankment. Strength of the Beldars is doubled to meet with any emergency. An additional Sub Engineer is deputed on L.M.B and R.M.B to assist the Sub Engineer L.M.B and R.M.B sections. Flood material is placed on various huts along R.M.B and L.M.B and night watching by the Sub Divisional Officer, Sidhnai H/Works Sub Division and Executive Engineer, Sidhnai H/Works Division, is carried out.

3. HIGH FLOOD

When discharge U/S increases from 60,000 Cs, the flood water is accumulated along R.M.B and L.M.B. Additional Sub Divisional Officer is deputed to assist Sub Divisional Officer, Sidhnai H/Works Sub Division for day and night watching. Beldars work in 3-shifts, each of 8-hours. Additional Sub Engineer from T.S Link Sub Division and Kacha Khuh Sub Division will work on L.M.B and R.M.B. Special night watching is carried out on J-Head spurs RD:20+800, 38+000 L.M.B and 99+500 R.M.B. Executive Engineer, Northern Tubewell Division (NTD) Multan is also deputed at this stage to help and assist Executive Engineer, Sidhnai Headworks Division, Sidhnai.

4. VERY HIGH FLOOD.

When discharge increases beyond 90,000 Cs, special day and night watching is carried out and all the officers move round the clock. Special attention is given for the protection of main Barrage, structure and gauges are observed after every one

hour. The staff present on breaching section at RD:16 R.M.B is highly alerted and keeping in view the rising condition of River Ravi D/S Balloki, presence of explosive in the liners is ensured.

5. EXCEPTIONALLY HIGH FLOOD

At this stage River Ravi is in rising condition and flows with more than 120,000 Cs whereas the design capacity of the Barrage is 150,000 Cs. All the staff is alerted. Superintending Engineer, Trimmu Canal Circle, Trimmu resides at the Barrage and critical gauge at RD:10+000 L.M.B is continuously watched. As soon as the critical gauge reaches at the level of 478.00 ft. and is further rising, operation of the breaching section is carried out by the Pak Army, 176 Bridge Battalion, Abdul Hakim Cantt: and all the people / local inhabitants are informed well before time to vacate their dwellings. The spill channel is operated, before operating the breaching section, if the river is likely to fall when the critical gauge is going to touch the limit of 478.00.

Chapter – 6

FLOOD DAMAGE RESTORATION WORKS AND OTHER REPAIR WORKS CARRIED OUT

No flood damages occurred during flood season 2022. Hence, no flood restoration / repair work carried out.

Chapter – 7

Flood Fighting Watching Arrangement

7.1 Pre-Flood Arrangement.

All the bunds are being inspected by a Committee constituted by the Secretary to Government of the Punjab, Irrigation Department in May every year. Inspection of all bunds and spurs by the Team of Military personals will be carried out before the flood season 2023 to ensure that the bunds are safe against the coming flood season.

Camps will be established on all vulnerable sites to monitor the situation during flood season. Cell phones, wireless sets will be provided and generator will be installed at important / vulnerable reaches. The flood watching material will be procured and will be shifted to the camp sites.

Keeping in view the possibility of receiving floods, precautionary measures will be taken from 1st July to 15th October. Watching establishment will be employed for the flood season as per limits of flood already fixed for various magnitude of Discharge in River Ravi.

STRUCTURE WISE RESERVE STOCK OF STONE

S.#	Name of Structure	Sanctioned Quantity (Lac Cft)	Available Quantity (Lac Cft)	Balance quantity (Lac Cft)	Remarks
1	U/S Guide Bund.	2.50	2.49	-	The available quantity is more than minimum requirement.
2.	D/S Guide Bund.	1.50	2.19	+ 0.69	
3.	J-Head Spur RD: 99500 RMB.	1.00	0.55	0.45	
4.	Mole Head Spur RD: 15000 LMB.	0.50	0.35	0.15	
5.	J-Head Spur RD: 20800 LMB.	1.00	0.86	0.14	
6.	J-Head Spur RD: 38000 LMB.	1.00	0.46	0.54	
	Total	7.50	6.90	0.60	

7.2 WATCHING ESTABLISHMENT

Flood watching establishment will be employed as per limit of floods already fixed for various Magnitude of discharges in the river from 15-6-2023 to 15-10-2023 as below: -

Sr. No.	Site Descriptoon	Flood Limits							
		Low		Medium		High		Very High	
		Men	Shift	Men	Shift	Men	Shift	Men	Shift
1.	Right Marginal Bund	No extra labour is required.		273	3 Shifts	273	3 Shifts	273	3 Shifts
2.	Left Marginal Bund	No extra labour is required.		193	3 Shifts	193	3 Shifts	193	3 Shifts

A	Right Marginal Bund RD:0+115000 J-Head Spur RD:99500 RMB = 7200'		
	Total Length = 115000 + 7200 = 122200' 122200 / 5000 = Say 25 Miles		
	Watchman Required	(3 No. per mile for three shift) (25x3x3)	= 225 No.
	Mate required	1 No. per 8 Beldars(225/8)	= 28 No.
	Gauge Reader required (for 02 No. Gauge Sites)	One No. for per shift(2x3)	= 06 No.
	Dak Runner required (for 01 No. Camp Site)	One No per shift	= 02 No.
	Chowkidars required	One No. per site for day & one for night (2x6)	= 12 No.
	Total Strength Deployed		= 273 No.
B	Left Marginal Bund RD:0+89585		
	Total Length = 89585' 89585 / 5000 = Say 18 Miles		
	Watchman Required	(3 No. per mile for three shift) (18x3x3)	= 162 No.
	Mate required	1 No. per 8 Beldars (162/8)	= 20 No.
	Gauge Reader required (for 01 No. Gauge Sites)	One No. for per shift (1x3)	= 03 No.
	Dak Runner required (for 01 No. Camp Site)	One No per shift	= 02 No.
	Chowkidars required	One No. per site for day & one for night (1x6)	= 06 No.
	Total Strength Deployed		= 193 No.

7.3 ARRANGEMENT AT SENSITIVE SITES

- i) The normal strength for watching at sensitive sites along flood protection and River training works will be doubled during high flood / exceptionally high flood.
- ii) The establishment can be increased after consultation with Executive Engineer, Sidhnai Headworks Division, Sidhnai / Superintending Engineer, Trimmu Canal Circle, Trimmu in emergency & in accordance with site requirements. The same establishment will be responsible for maintenance of flood bunds and Spurs Shank etc. during 2022. It will arrange minor repairs to bund top, side slopes, removal of Sarkanda on pitched part of spurs. Establishment will also be responsible for filling gharas / rain cuts etc as occurred due to rains during the monsoon season.

7.4 Watching Material

ENGINEERING / EMERGENCY STORES WILL BE STOCKED AT EACH CAMP AS UNDER.

S.#	Item	Unit	Total reserved Qty	Available Qty	Balance Qty	Remarks
1	Kassies with handles	Nos	70	55	15	Balance Flood Fighting Material will be purchased before flood 2023 in case of emergency.
2	Baskets	Nos	185	185	-	
3	Gunny Bag	Nos	2300	1800	500	
4	Torches three cells	Nos	20	20	-	
5	Lanterns	Nos	52	52	-

17	Hydraulic Staring Boat	Nos	1	1	-	
18	Chimney for patro max lamp	Nos	8	8	-	
19	Shouldari	Nos	3	2	1	
20	Handles for Kassies (Extra)	Nos	150	150	-	
21	G.I. Buckets	Nos	25	25	-	
22	Swiss Cottage Tents	Nos	3	3	-	
23	Bamboos	Nos	4	4	-	
24	Munj Trangers	Nos	188	188	-	
25	Iron Charpies	Nos	13	9	4	
26	Steel Chairs	Nos	6	-	6	
27	Table	Nos	4	1	3	
28	Crockery Set	Nos	2	2	2	
29	Generator	Nos	3	3	-	
30	Wire/ cable 3/29	Rolls	6	-	6	
31	500 Volt Bulbs	Nos	16	-	16	
32	Plastic Bags (1.25 – 1.5) Capacity	Nos	4440	1140	3300	
33	Water Set	Nos	5	2	3	
34	Petrol for generator	Ltr	900	-	900	
35	Tractor with Trolley	Nos	1	1	-	
36	Sand Bag Filling Machine	Nos	2	2	-	
37	Diesel for Tractor	Ltr	2100	-	2100	
38	Petrol for Boat	Ltr	1000	-	1000	

7.5 Sounding and Probing Arrangement

In case of any situation on flood protection and River training works, sounding and probing arrangement will be made.

7.6 Lighting Arrangement

Details given in the list of watching material at Sr.No 7.4 above.

7.7 Ration Arrangement

In case of high flood in Ravi River a separate evacuation plan will be prepared by the concerned District Administration and Food Department will mobilize their sources for supplying food for Human and cattle population.

7.8 P.O.L arrangement for Vehicle

P.O.L facilities / arrangement will be made by the Irrigation Department as well as Civil Administration.

7.9 Transportation

Transportation facilities will be provided by the Civil Authorities

7.10 Law and order

Law and order situation will be tackled by the Civil Administration with the help of Police Department.

7.11 Medical arrangement for Labour

Health Department will be responsible for mobilizing their sources for carrying out necessary operation for providing medical facilities to the labour.

7.12 Liaison with other Department.

The close liaison will be made in case of flood with the administrative department as well as other Department of the concerned Districts.

7.13 Role of the Army

176-Bridge Batalian Abdul Hakim / 2 Corp Engineering Multan will perform activities to fight flood emergency During Flood 2023.

7.14 Duties of Telephone attendant.

Duty of telephone attendant has been made round the clock.

S.No	Name of official	Period	Time	
			From	To
1	Muhammad Saleem	15-06-2023 to 15-10-2023	00.00	08.00
2	Arslan Rafique		08.00	16.00
3	Farukh Eijaz		16.00	24.00

7.15 Wireless Arrangements

Wireless system / arrangement will be made for the vehicles under use of Officers of Sidhnai Headworks Division, Sidhnai during the period of 15 June 2023 to 10 October, 2023.

Chapter – 8 status of Encroachments

ORDINARY ENCROACHMENT.

Total No of Encroachments	Removed	Balance	Action to be taken
678 No. (44.58 Acres)	7 No. (0.20 Acres)	671 No. (44.38 Acres)	The list of encroachments have been sent to concerned civil administration for launching combined operation for its removal.

CRITICAL ENCROACHMENT.

Total No of Encroachments	Removed	Balance	Action to be taken

Chapter – 11

Standard Operating Procedure (SOP) for Breaching Sections

11.1 HISTORY OF THE BREACHING SECTION

In order to protect the Barrage and its auxiliary works from onslaught of the floods, the proper site for breaching section has been fixed by the Department at RD:16+000 of Right Marginal Bund of Sidhnai Barrage, after its approval by the Punjab Flood Commission during its 56th meeting held on 17th June 1974. A critical gauge has been provided at RD:10+000 Left Marginal Bund to watch the thrust of the flood. On achieving the flood level as 478.00 at this critical gauge and while the river is still in raising position, the breaching section at RD:16+000 Right Marginal Bund is activated. However before activation of the breaching section, the spill channel provided at RD:15000 Right Marginal Bund is operated to give maximum relief to the Barrage against the thrust of floods. The water flowing through the Breaching Section and the Spill Channel ultimately enters into the old course of the river and after traveling a distance of about 20 miles, it joins the river as experienced in the past. The existing arrangement regarding Breaching Section is for the safety of the Barrage and infrastructures.

11.2 LOCATION, DESIGN, QUANTITY AND VARIETY OF THE EXPLOSIVE REQUIRED FOR DETONATION

The breaching section is located at RD:16+000 of Right Marginal Bund U/S Sidhnai Barrage. There are two segments of the section, each contains 65 Nos liners. Two types of explosives can be used in the liners, one is powder explosive and other is liquid explosive.

For detonation, both types of explosives are lying in the Army magazine 176 Bridge Battalion, Abdul Hakim.

CURRENT STATUS OF EXPLOSIVE.

Name of explosive	Quantity required	Available quantity	Balance quantity	Previous outstanding dues.
Safety Fuze.	30 Mtr	27 Mtr	3 Mtr	No outstanding dues.
Wabocard.	1500 Mtr	1497 Mtr	3 Mtr	

Name of explosive	Quantity required	Available quantity	Balance quantity	Previous outstanding dues.
Firing Cable.	2053 Mtr	2053 Mtr	-	-
Elec Wire.	240 No	240 No	-	-
Det No 8 Elec	24 No	24 No	-	-
Non Elec	05 No	05 No	-	-
PE-3A / Wa Box	3250 KG	3250 KG	-	-
MS Electric Delay Det (3 Mtr)	105 No	105 No	-	-

11.3 ARRANGEMENT OF EXPLOSIVE AND SECURITY OF EXPLOSIVE STORES.

The explosives are in the custody of the Pak Army, 176-Bridge Battalion, Abdul Hakim. Therefore, the Army Unit 176 Bridge Battalion, Abdul Hakim, is responsible for availability, arrangement and security of the explosive stores.

11.4 LIST OF THE SECURITY STAFF WITH DETAIL OF THEIR TRAINING ETC.

Although the maintenance of entire explosive and its detonation, when required, is the responsibility of the 176-Bridge Battalion Abdul Hakim; However, the Executive Engineer, Sidhnai Headworks Division, Sidhnai and Sub Engineer Headworks have been trained by the Army for the detonation of the breaching section.

11.5 DETAIL OF MEACHNAICAL MEANS AS A STANDBY ARRANGEMENTS IN CASE OF DETONATION FAILURE

Although there is no regular standby arrangement of mechanical means available with the department for operation of the Breaching Section in case of detonation failure but the requisite arrangement is planned to be made, when required, with the coordination of local Military authorities, Agriculture Engineering and Highway Departments.

It is proposed to keep two No. agriculture dozers available at site at very high flood level. One No. dozer will be used for closing any leakage and the other for

developing, the cut at breaching site on RMB-Head Spill Channel. Sub Divisional Officer, Headworks Sub Division, Sidhnai, will ensure availability of the machinery and its being in perfect order.

11.6 DUTY ROSTER IN CASE OF CRITICAL SITUATION

Sub Divisional Officer, T.S Link Sub Division, Shorkot Cantt: Sub Engineer, Spill Section, and other establishment will be present at Head Spill to watch and control the situation for operating the breaching section. The Executive Engineer, Sidhnai Headworks Division, Sidhnai will supervise the situation and remain vigilant about the critical gauge, provided at RD:10+000 of Left Marginal Bund. As soon the gauge hits the critical level i.e. 478.00 and the river is still in rising condition, the requirement of operating the breaching section be established. The rising/ falling condition of the river in the forthcoming hours is assessed by receiving 3-hourly gauges from Balloki.

As soon as the flood at Balloki reaches at a very high stage and it is still in rising position, flood situation is brought to the notice of Civil Administration and Army authorities so as to inform the public and arrange their evacuation. The operation of the breaching section will be intimated to Army authorities by the Executive Engineer, Sidhnai Headworks Division at least 12-hours in advance as desired by the Commanding Engineer, 2-corps Multan for making arrangement to shift their explosive to the breaching site.

Similarly, the Civil Administration is also informed about the operation of breaching section at least 12-hours in advance.

11.7 BREACHING COMMITTEE WITH THEIR ACTION PLAN

In pursuance of Secretary, Irrigation Department, Lahore Notification No. SO (Floods) VI-33/97 dated 15-07-2015, the following breaching operation committee has been constituted who supervise and carry out physical activities for the activation of the breaching section.

- | | |
|--|----------|
| 1) Deputy Commissioner,
Toba Tek Singh | Convener |
| 2) Deputy Commissioner/ Representative
Khanewal | Member |
| 3) Executive Engineer, | Member |

4)	Sidhnai Headworks Division, Sidhnai. Representative of Highway Department/ Railway not below rank of BS-18	Member
5)	Representative of C&W Department Not below rank of BS-18	Member
6)	Representative of Pakistan Army Not below rank of a Lt. Colonel	Member

All concerned will be informed before operation of breaching section and it is duty of the Executive Engineer, Sidhnai Headworks Division, Sidhnai to inform all the concerned.

1. Secretary to Government of the Punjab, Irrigation Department, Lahore.
2. Chief Engineer, Irrigation Multan Zone, Multan.
3. Chief Engineer, Irrigation Zone, Faisalabad.
4. Chief Engineer, Drainage & Flood Zone, Lahore.
5. Flood Relief Commissioner, Lahore.
6. Superintending Engineer, Trimmu Canal Circle, Trimmu.
7. Director Floods, Lahore.
8. Executive Engineer, Trimmu Barrage Division, Trimmu.
9. Deputy Commissioner, Toba Tek Singh.
10. Deputy Commissioner, Khanewal.
11. District Police Officer, Toba Tek Singh.
12. District Police Officer, Khanewal.
13. Executive District Officer, (Works & Services), Toba Tek Singh.
14. Executive District Officer, (Works & Services), Khanewal.
15. All Sub Divisional Officers employed on watching.
16. All Sub Engineer on duty at Sidhnai Barrage.
17. Executive Engineer, WAPDA Electricity, MEPCO Mian Channu.
18. Divisional Engineer, Telephone, Khanewal.
19. Executive District Officer, (Health), Khanewal.

11.8 LIST OF VILLAGES LIKELY TO BE INUNDATED IN CASE OF BREACHING

As indicated on the map as well, water escaping from the activated breaching section & Spill Channel will flow along Right Bank of Spill Channel. Due to construction of Motorway M-3 and M₅₄ which will act as barrier in flood routing,

expectedly. The flood water due to obstruction would create an afflux U/S of Motorway. The higher authorities including Pak Army is on board for this issue. The decided new flood drainage structure has not been implemented at site. Hence, the Motorway authorities would be responsible for draining the flood water across M-3 and M-4.

The flood water will inundate Multan – Jhang Road at about 85-KM from Multan, breach tail portion of Koranga Disty & thus will join river Ravi after traveling a distance of about 20 miles. The flood water flowing on the right, as mentioned above, will inundate/ damage an area of about 84,000 acres & the villages, abadies and other infrastructures, like roads and embankments are detailed as under:-

1. Chak No.8-D, 9-D, 11-D, 10-G and 37-M.
2. Waliyatpur.
3. Mai Saphoran
4. Aroti
5. Tiba Jhenderian.
6. Dogar Malang.
7. Tail Koranga Disty.
8. Railway track connecting Abdul Hakim Jhang.
9. Metalled road linking Sidhnai Barrage to Pir Mehal.
10. Metalled Road linking Kabirwala-Jhang Towns.

A population of about 8000 people will be affected.

11.9 ANNOUNCEMENT AND DETAILS OF EVACUATION ARRANGEMENTS.

Since time lag for the flood water to reach from Balloki to Sidhnai Headworks is 78-hours, Irrigation Department has sufficient time to inform Civil Administration about the flood situation for warning the civil abadies, their evacuation and other protective measures.

11.10 DETAILS OF COORDINATION WITH CIVIL/ ARMY AUTHORITIES

The flood activities of Sidhnai Headworks Division, Sidhnai have been entrusted to 176 Bridge Battalion Abdul Hakim Cantt: under the control of a Lt. Colonel. The Irrigation Department has full co-ordination with the Bridge Battalian regarding all the activities of the flood.

11.11 PARALLEL COMMUNICATION ARRANGEMENTS.

Sidhnai Headworks Division, Sidhnailinked up with the Wireless system installed at Sidhnai Barrage. Independent wireless sets will be installed in the vehicles of the Executive Engineer and the Sub Divisional Officer in-charge of the Barrage. Additional wireless sets will be demanded as per requirement during emergency.

11.12 PLAN OF BREACHING SECTION

Plan of Breaching Section is attached.

**Sub Divisional Officer
Headworks Sub Division
Sidhnai**

**Executive Engineer
Sidhnai Headworks Division
Sidhnai**

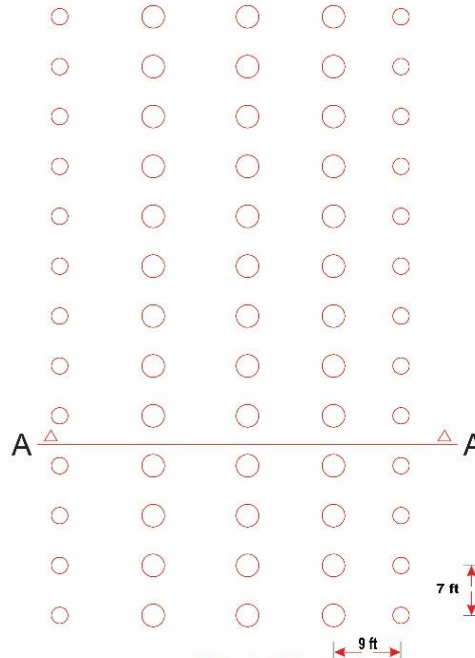

**Superintending Engineer
Trimmu Canal Circle
Trimmu**

**Chief Engineer

5. Representative from Pakistan Army not below the rank of a Lt. Colonel.	Member

PART – B

Chapter – 12

VULNERABLE SITES ON FLOOD BUND/ STRUCTURES

12.1 Apprehended breaches in flood bunds / structures

There is one vulnerable reach at RD:32+000 Right Marginal Bund.

12.2 Operation of Breaching Section.

When the breaching section is operated, the embankment of Motorway M-4 will obstruct the flood water way and hence the efficiency of breaching section as well as right embankment of spill channel will directly come under threat from RD:0+000 to RD:31+000. Although National Highway Authority has submitted an undertaking that the flood structure provided by them are sufficient to drain flood water without any damage to infrastructure yet irrigation authorities has great concerns.

12.3 Breaches Due To Rising of Flood Water, Deterioration of Flood Bunds Etc.

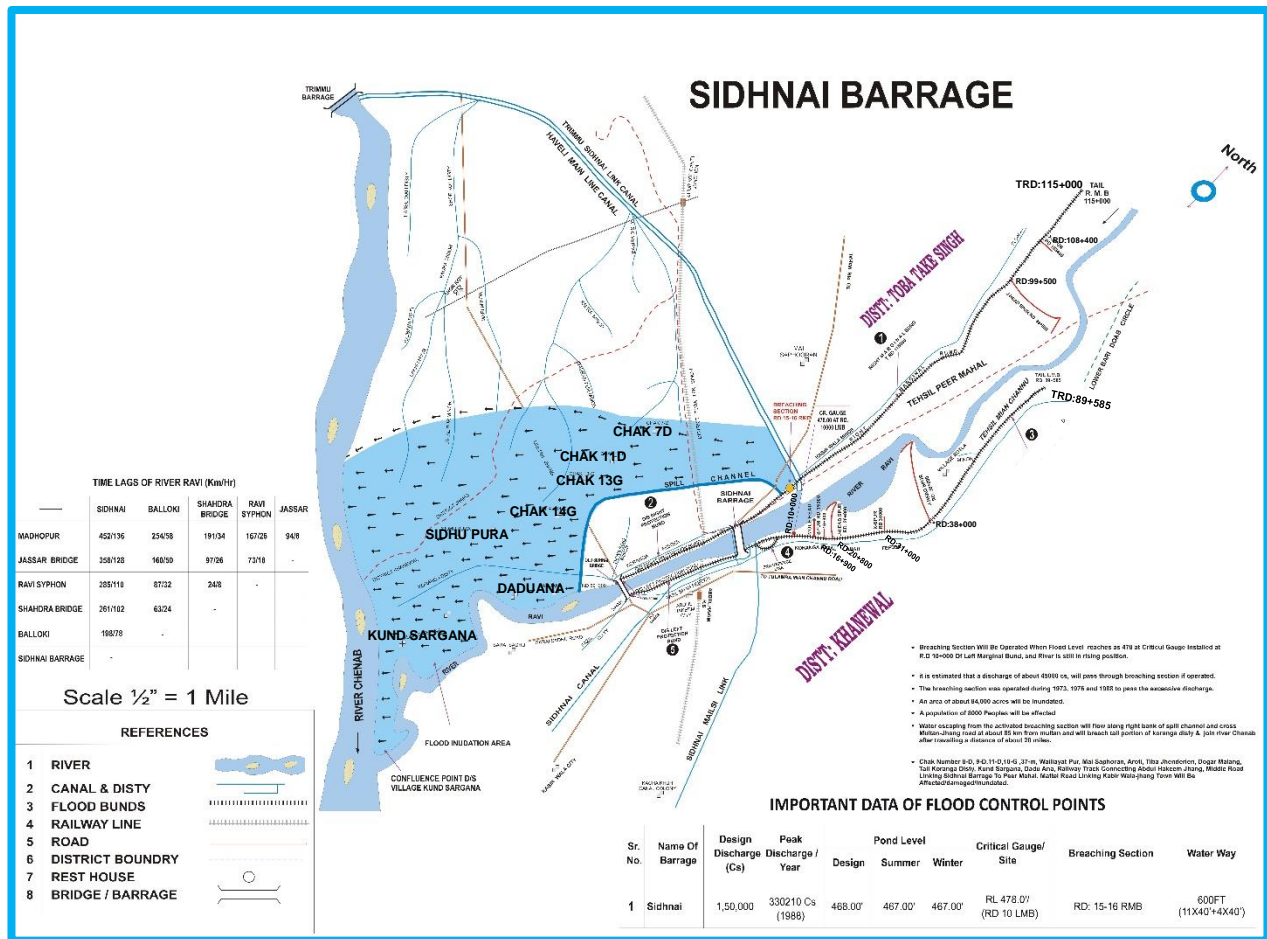

Sidhnai Barrage has a design capacity of 150000 Cs. Since its date of construction, an earthen bela is formed on right side of Barrage and has masked up almost 6 to 8 gates of Sidhnai Barrage. It is very important to mention here that due to this bela, the discharge capacity of barrage will definitely be reduced, resulting in raising upstream flood water and an early operationing of breaching section as compared to historical data.

Chapter – 13

EMERGENCY CONTINGENCY / PLAN FOR VULNERABLE SITE (SITES) LISTED ABOVE

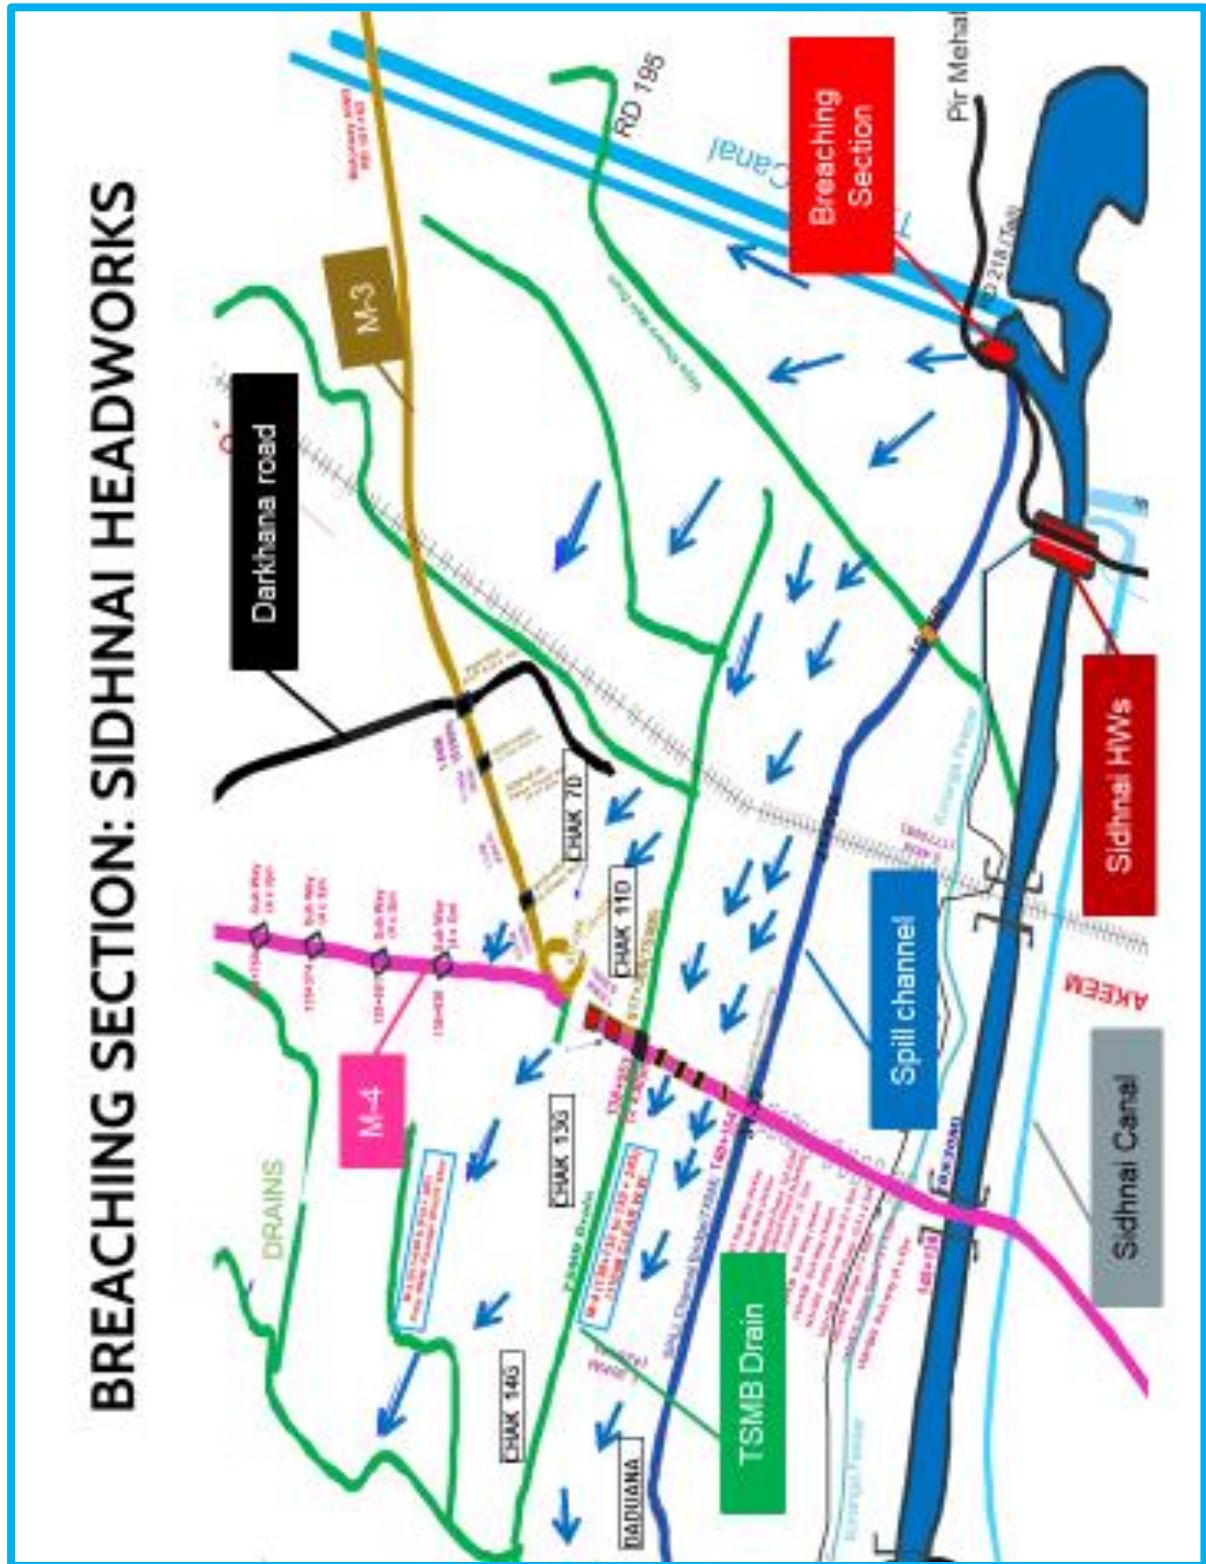

13.1 Plan showing route of flood water coming out of the breach Supported with levels

The flood water hits directly Abdul Hakim-Faisal Abad road after it passes to cross T.S.Link RD: 193 & H.M.Line RD: 192 and then water will join into breaching section water flow (Plan attached).

13.2

Detail of village abadies likely to be affected and this should also be shown on the plan.

13.3 Strategy and action taken be explained in detail. This may include
Strategy to be adopted has been explained in detail in chapter 5 of flood fighting plan.

13.3.1 ARRANGEMENTS

A Flood Control Centre will be established in Canal Telegraph Office of Sidhnai Headworks Division and responsible staff will be available round the clock. One base of high range wireless set will be installed at Sidhnai Headworks Office Sidhnai by the Police Department. 02 No. mobile Motorola sets of 30 KM range will be provided for installing in the vehicles of Executive Engineer, Sidhnai Headworks Division and Sub Divisional Officer Headworks Sub Division to keep them vigilant all the time.

13.3.2 Establishment of flood fighting camps

Flood watching establishment will be employed as per limit of floods already fixed for various Magnitude of discharge in the river from 15-6-2023 to 15-10-2023 as per following:-

A	Right Marginal Bund RD:0+115000 J-Head Spur RD:99500 RMB = 7200'		
	Total Length = 115000 + 7200 = 122200' 122200 / 5000 = Say 25 Miles		
	Watchman Required	(3 No. per mile for three shift) (25x3x3)	= 225 No.
	Mate required	1 No. per 8 Beldars (225/8)	= 28 No.
	Gauge Reader required (for 02 No. Gauge Sites)	One No. for per shift(2x3)	= 06 No.
	Dak Runner required (for 01 No. Camp Site)	One No per shift (2)	= 02 No.
	Chowkidars required	One No. per site for day & one for night (2x6)	= 12 No.
	Total Strength Deployed		= 273 No.
B	Left Marginal Bund RD:0+89585		
	Total Length = 89585' 89585 / 5000 = Say 18 Miles		
	Watchman Required	(3 No. per mile for three shift) (18x3x3)	= 162 No.
	Mate required	1 No. per 8 Beldars (162/8)	= 20 No.
	Gauge Reader required (for 01 No. Gauge Sites)	One No. for per shift (1x3)	= 03 No.
	Dak Runner required (for 01 No. Camp Site)	One No per shift (2)	= 02 No.
	Chowkidars required	One No. per site for day & one for night (1x6)	= 06 No.
	Total Strength Deployed		= 193 No.

13.3.3 Duties of Officer / Officials and their camp sites.

Camp location	Officers (Name + designation + Mobile No)	Official (name + designation + Mobile No)
At RD: 30+000 RMB	Muhammad Hameed Mughal SDO, Kacha Khuh Sub Division 0302-7867400	Muhammad Usman, Sub Engineer, RMB 0311-6222111

36	Sand Bag Filling Machine	2.Nos	2.Nos		
37	Diesel for Tractor	2100 Liter		2100 Liter	
38	Petrol for Boat	1000 Liter		1000 Liter	

The balance quantity will be recouped before start of flood season 2023.

13.4 Detail of other infrastructure like Electric, Sui Gas, Telephone installations,Road network, other Buildings, Canals and Drainage network.

On breaching of River Training / Flood Protection Works of Sidhnai Headworks Division, Sidhnai, following Irrigation and roads networks shall be effected.

- **Main Irrigation Net work.**
 - T.S.Link
 - Haveli Main Line
 - Kabirwala Disty

- Darkhana Disty
- Darkhana Drain
- TSMB Main Drain

- **Main Road Network**
 - Pir Mahal-Faisalabad Road
 - Jhang Multan Road

- **Other Buildings / Structure**
 - Govt.High School Mai Saphoran
 - RHC
 - Primary school, Middle school

- **Sui Gas**
 - Sui gas line crossing at about 17000 ft D/S Sidhnai Headworks

Chapter – 14 Action Plan.

14.1 Re-shuffling / Recouping plan of reserve stone departmentally.

The sufficient quantity of the stone has been available at suitable places and will be shifted as and when the necessity arises.

14.2 Detail of inlet / outlet crossing along with closing methodology.

Sr. No.	Name of Bund / Spur	RD No.	Outlet / Inlet	Existing Position
1	Left Marginal Bund	14+500	Outlet	Water crossing for irrigation purpose.
2	Left Marginal Bund	20+800	Outlet	Water crossing for irrigation purpose.
3	Left Marginal Bund	25+000	Outlet	Water crossing for irrigation purpose.
4	Left Marginal Bund	31+500	Outlet	Water crossing for irrigation purpose.
5	Left Marginal Bund	38+000	Outlet	Water crossing for irrigation purpose.
6	Left Marginal Bund	48+000	Outlet	Water crossing for irrigation purpose.
7	Left Marginal Bund	51+500	Outlet	Water crossing for irrigation purpose.
8	Left Marginal Bund	62+400	Outlet	Water crossing for irrigation purpose.
9	Left Marginal Bund	68+000	Outlet	Water crossing for irrigation purpose.
10	Left Marginal Bund	75+300	Outlet	Water crossing for irrigation purpose.
11	Left Marginal Bund	84+500	Outlet	Water crossing for irrigation purpose.
12	Left Marginal Bund	85+500	Outlet	Water crossing for irrigation purpose.

All the outlets crossing along flood bunds will be closed before coming flood 2023.

14.3 Deployment Machinery (Medium to high flood).

DEPLOYMENT OF MACHINERY AND LABOUR

S.#	Name of structure	Length in mile	Vulnerable site	Camp location	Site incharge by name & cell No.	Machinery Deployed				Labour Beldar +	Availability of stone (Lac Cft)
						Excavat or	Dozer	Trolley/ dumper	Tractor with front
